adequate off-street car parking in accordance with Policies T1 and T2 and Appendix 5 (Car Parking Standards) of the South Oxfordshire Local Plan 2011.

12. That the bathroom window in the east elevation of the dwelling on Plot 1 hereby permitted shall be glazed in obscure glass prior to the first occupation of the accommodation and it shall be retained as such thereafter.

Reason: To ensure that the development is not unneighbourly in accordance with Policy D4 of the South Oxfordshire Local Plan 2011.

13. That the proposed rooflights in the east elevation of the dwelling on Plot 1 shall have an internal cill height of not less than 1.8 metres off the finished first floor level.

Reason: To ensure that the development is not unneighbourly in accordance with Policy D4 of the South Oxfordshire Local Plan 2011.

14. Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) Order 1995 (or any Order revoking or re-enacting that Order) no additional window(s), door(s) or other openings shall be inserted in the east elevations and roofslopes of the dwellings on Plots 1, 7 and 11 of the development hereby approved.

Reason: To safeguard the amenities of the occupiers of adjoining properties in accordance with Policies D4, H4 and T1 of the South Oxfordshire Local Plan 2011.

15. That the ground floor windows in the east elevation of the dwellings on Plot 7 shall be fixed shut non-opening windows.

Reason: To ensure the windows do not obstruct pedestrian access in accordance with Policies T1, T2 and H4 of the South Oxfordshire Local Plan 2011.

16. A full archaeological watching brief shall be carried out during the period of construction works by a professionally competent archaeological organisation in accordance with details which shall have been submitted to and approved in writing by the local planning authority before development commences. The brief shall include the recording of any archaeological features revealed, limited archaeological excavation and the retrieval of artefactual evidence.

Reason: To secure the protection of and proper provision for any archaeological remains in accordance with Government advice set out in PPG16 ‘Archaeology and Planning’ and in accordance with Policies CON11, CON13 and CON14 of the South Oxfordshire Local Plan 2011.

17. No development shall take place until the Local Planning Authority are satisfied that the following measures (a-c) have been undertaken to investigate and
Old School Site, Nettlebed, Henley-on-Thames, Oxfordshire

NGR: SU 699 867

Written Scheme of Investigation for an Archaeological Watching Brief

Planning Ref. P07/E1350

1 Introduction

1.1 Planning permission has been granted by South Oxfordshire District Council for the demolition of former school buildings and construction of several new dwellings, an access road, a new open space and landscaping. The site lies within an area of archaeological potential and therefore, in line with PPG16 and Policies CON11, CON13 and CON 13 of the South Oxfordshire Local Plan 2011, an archaeological watching brief has been required, to be undertaken during all groundworks.

1.2 This Written Scheme of Investigation details how Oxford Archaeology (OA) will implement the requirements of the Oxfordshire County Archaeological Service (OCAS). The first part is site specific while the appendices detail general OA standards and procedures.

2 Geology and Topography

2.1 The development site is located on the southern side of the village of Nettlebed, Henley-on-Thames (NGR: SU 699 867). The site lies at approximately 185 m OD and the underlying geology is Kimmeridge Clay.

3 Archaeological Background

3.1 The site lies approximately 500 m to the south-west of Windmill Hill, where several instances of Mesolithic activity have been recorded.

3.2 In 1913, an apparently in situ Mesolithic 'working floor' was recorded in the section of a sand pit located on the west and south-west margins of Windmill Hill, from which was recovered a significant assemblage of blades, blade cores microliths and other possible tools. At least one hearth was also recorded (Peake, 1915). Subsequent work on the assemblage has suggested that it is probably early Mesolithic in date (Jacobi, 1973). Mesolithic activity has also been observed at two other locations in the same locality (Boismier, 1996).

3.3 In April 1994, Wessex Archaeology undertook a sample excavation on the north-eastern side of Windmill Hill, revealing evidence for flint working dating to the later Mesolithic period. Spatial analysis of the assemblage indicated that the site was subject to multiple reoccupations by hunter-gatherers (Boismier, 1996).

3.4 St. Bartholomew's Church located to the northwest of the proposal site was built in 1845-6, superseding an earlier church of which little is known. It may however have had Norman origins. If so, then this end of the High Street may have been the early nucleus of the settlement. The earliest find within the general environs of the
proposal site is a coin of Vespasian (69-79 AD) found in a garden off the High Street not far from the proposal area (SMR 2022 – SU 6995 8670) (OA, 2007).

3.5 An archaeological watching brief was carried out in 2005 by Thames Valley Archaeological Services on the adjoining land to the west during the construction of the new school buildings (TVAS Site Code NSN04/124). This revealed a probable boundary ditch of unknown date, but no other significant evidence was recorded (OA, 2007).

3.6 Nettlebed has long been associated with the brick working industry as well as associated clay quarrying. The first literary reference to such activity dates to the 15th century and the industry was in evidence until the 20th century. A bottle kiln dating to the 18th or 19th century approximately 200 m north-east of the development site, is the only one of its type surviving (Lethbridge Kingsford, 1919; Bond et al). By the 19th century, earthenware pottery was also being produced in Nettlebed (OA, 2007).

4 Aims

4.1 To preserve by record any archaeological remains (if present) that the works may remove or damage within the area of the site being investigated.

4.2 To signal, before the destruction of the material in question, the discovery of a significant archaeological find, for which the resources allocated are not sufficient to support a treatment to a satisfactory and proper standard. All groundworks will be halted until the remains have been suitably investigated and dealt with by the attending archaeologist.

4.3 To make available the results of the investigation.

5 Strategy

5.1 The watching brief will observe groundworks that may affect or reveal archaeological deposits. This will include monitoring the excavation of foundations and service trenches, surface stripping and other invasive groundworks.

5.2 Excavation of archaeological features will be undertaken to fulfill the basic objective of retrieval of archaeological data affected by the works. In the event that human remains are discovered, and their retrieval cannot be avoided, OA will obtain the necessary burial license from the Ministry of Justice and remove the remains to established OA practices and with due care and respect. Wherever possible human remains will be located and planned and left in-situ.

5.3 All features and deposits will be issued with unique context numbers, and context recording will be in accordance with the established OA Field Manual (OA 1992). All contexts, and any small finds and samples from them will be allocated unique numbers. Bulk finds will be collected by context. Colour transparency and black-and-white negative photographs will be taken of all trenches and archaeological features.

5.4 Deposits deemed to be of potential environmental significance will be appropriately sampled and analysed for environmental and economic indicators.
5.5 Site plans will be drawn at an appropriate scale (normally 1:50 or 1:100) with larger scale plans of features as necessary. Section drawings of features and sample sections of trenches will be drawn at a scale of 1:20. Full trench sections will be drawn only if complex stratigraphy is present.

5.6 The project will be carried out by a suitably qualified OA supervisor, under the overall direction of a project manager and OA Head of Fieldwork, Dan Poore.

5.7 The watching brief will be monitored by Oxfordshire County Council Archaeological Services.

6 Report and Archive

6.1 A client report (Appendix 8) on the results of the investigation will be completed within three weeks of the end of the fieldwork. The project supervisor and OA finds specialists will undertake the report stage under the direction of the project manager. Copies will be forwarded to the client. Two copies of the report will be submitted to the County Archaeological Service and the SMR.

6.2 If environmental remains are recovered, then the staff from the OA Environmental Department will scan these to assess the potential of the remains. Detailed analysis, if required, would normally be undertaken by the University Museum, Oxford.

6.3 The County Museums Service (Oxfordshire Museums), if required, will undertake finds conservation.

6.4 The site archive including finds (subject to the landowner's agreement) will be deposited with the County Museums Service (Oxfordshire Museums) in an approved format.

7 Health and Safety

7.1 OA will comply with all relevant health and safety legislation.

8 References

OA 2007 Former Nettlebed CP School Site, Oxfordshire Written Scheme of Investigation.

9 General

Appendices 7, 8 and 11 are relevant.

OA Standard Fieldwork Methodology Appendices

7 WATCHING BRIEFS

7.1 Ground disturbances (demolition, general site strip and levelling, reduction for roads, excavation for service trenches and foundation trenches) will be monitored by an archaeological supervisor assisted, where necessary, by archaeological technicians and under the overall guidance of a project manager.

7.2 All archaeological features and deposits exposed will be recorded.

7.3 Where only the tops of features or deposits are exposed, these will be located on a site plan, planned, and recorded by written description and by photographs.

7.4 Visible artefacts will be collected in order to assist in the dating of features and deposits.

7.5 Where trenches are excavated through cut features (pits, ditches, etc.) and vertical stratigraphy is not present, the features will be recorded in section with appropriate collection of finds.

7.6 Where ground disturbance exposes stratified remains or significant features, these will be hand excavated by the archaeologist and recorded.

7.7 The archaeological curator will be advised at the earliest opportunity of any archaeological features or deposits that appear worthy of preservation in situ.

7.8 On completion of the fieldwork the site archive will be compiled and security copied.

7.9 Proposals for analysis and publication will be determined in the light of the results of the fieldwork.

RECORDING

7.10 All on-site recording will be undertaken in accordance with the OA Field Manual (ed. D Wilkinson 1992).

7.11 A continuous unique numbering system will be operated. Written descriptions will be recorded on proforma sheets comprising factual data and interpretative elements.

7.12 Plans will normally be drawn at 1:50 but in urban or deeply stratified sites a scale of 1:20 will be used. Detailed plans will be at an appropriate scale. Burials will be drawn at 1:10.

7.13 A register of plans will be kept.

7.14 Sections of features or trenches showing stratigraphy will be drawn at 1:20 or 1:10.

7.15 A register of sections will be kept.

7.16 All sections will be tied in to Ordnance Datum if possible or into the contractors TBM.

7.17 A black and white and colour (35 mm transparency) photographic record, illustrating in both detail and
general context the principal features and finds discovered will be maintained. The photographic record will also include working shots to illustrate more generally the nature of the archaeological work.

7.18 Photographs will be recorded on OA Photographic Record Sheets.

7.19 All identified finds and artefacts from stratified archaeological deposits will be retained, although certain classes of building material or post medieval pottery may sometimes be discarded after recording if an appropriate sample is retained.

8 EVALUATION AND WATCHING BRIEF REPORTS

8.1 Style and format of the report will be determined by OA, but will include as a minimum the following:

- A location plan of trenches and/or other fieldwork in relation to the proposed development.
- Plans and sections of features as appropriate located at an appropriate scale.
- A section drawing showing depth of significant deposits (if encountered) including present ground level with Ordnance Datum, vertical and horizontal scale.
- A summary statement of the results.
- A table summarising per trench the features, classes and numbers of artefacts contained within, spot dating of significant finds and an interpretation.
- A reconsideration of the methodology used, and a confidence rating for the results.
- An interpretation of the archaeological findings within both the site and their wider landscape/townscape setting.

8.2 Copies of the report will be supplied to the client and the Archaeological Officer monitoring the works. Copies of the report will also be supplied to the County Sites and Monuments Record on the understanding that it will become a public document after an appropriate period of time (normally six months).

8.3 If the evaluation works generate archaeological results of importance which merit wider publication, the client will be consulted about further arrangements.

ARCHIVES

8.4 The site archive, including finds and environmental material, will be ordered, catalogued, labelled and conserved and stored according to the UKIC Guidelines for the preparation of excavation archives for long-term storage.

8.5 The site archive will be prepared to at least the minimum acceptable standard defined in Management of Archaeological Projects 2, English Heritage 1991.

8.6 The site archive will be microfilmed by the RCHME National Archaeological Record as a safeguard against the accidental loss and the long-term degeneration of paper records and photographs.

8.7 The site archive will be deposited with the relevant receiving Museum at the earliest opportunity unless further archaeological work on the site is expected within one year of completion of the archive. The OA will advise the landowner that any artefacts resulting from the project work should be given to the relevant Museum.

11 GENERAL

11.1 The requirements of the Brief will be met in full where reasonably practicable.

11.2 Any significant variations to the proposed methodology will be agreed with the local authority's archaeological representative in advance.

11.3 The scope of work detailed in the main part of the Written Scheme of Investigation is aimed at meeting the aims of the project in a cost-effective manner. Oxford Archaeology attempts to foresee possible site-specific problems and resource these. However there may be unusual circumstances which have not been included in the costing and programme.

- Unavoidable delays due to extreme bad weather, vandalism, etc.
- Complex structures or objects, including those in waterlogged conditions, requiring specialist
removal.
- Extensions to specified trenches or feature sample sizes requested by the archaeological curator.
- Trenches requiring shoring or stepping, ground contamination, unknown services, poor ground conditions requiring additional plant, specialist reinstatement of surfaces (i.e. tarmac, turf).

HEALTH AND SAFETY and INSURANCE

11.4 All work will be carried out to the requirements of Health and Safety at Work, etc. Act 1974, The Management of Health and Safety Regulations 1999, the OA Health and Safety Policy and Procedures Manual, and any main contractor's requirements.

11.5 A copy of the OA's Health and Safety Policy is available on request. OA will require copies of the H & S policies of all other contractors and operators present on site.

11.6 The OA holds Employers Liability Insurance, Public Liability Insurance and Professional Indemnity Insurance. Details will be supplied on request.

11.7 The OA will not be liable to indemnify the client against any compensation or damages for or with respect to:
- Damage to crops being on the Area or Areas of Work (save in so far as possession has not been given to the Archaeological Contractor);
- The use or occupation of land (which has been provided by the Client) by the Project or for the purposes of completing the Project (including consequent loss of crops). Interference whether temporary or permanent with any right of way, light, air or water or other easement or quasi easement which are the unavoidable result of the Project in accordance with the Agreement;
- Any other damage which is the unavoidable result of the Project in accordance with the Agreement;
- Injuries or damage to persons or property resulting from any act or neglect or breach of statutory duty done or committed by the client or his agents, servants or their contractors (not being employed by Oxford Archaeology) or for or in respect of any claims demands proceedings damages costs charges and expenses in respect thereof or in relation thereto.

COPYRIGHT and CONFIDENTIALITY

11.8 Oxford Archaeology will retain full copyright of any commissioned reports, tender documents or other project documents, under the Copyright, Designs and Patents Act 1988 with all rights reserved; excepting that it will provide an exclusive licence to the client in all matters directly relating to the project as described in the Written Scheme of Investigation.

11.9 Oxford Archaeology will assign copyright to the client upon written request but retains the right to be identified as the author of all project documentation and reports as defined in the Copyright, Designs and Patents Act 1988 (Chapter IV, s.79).

11.10 OA will advise the client of any such materials supplied in the course of projects that are not OA’s copyright.

11.11 OA undertakes to respect all requirements for confidentiality about the client's proposals provided that these are clearly stated. It is expected that such conditions shall not unreasonably impede the satisfactory performance of the services required. OA further undertake to keep confidential any conclusions about the likely implications of such proposals for the historic environment. It is expected that clients respect OA’s general ethical obligations not to suppress significant archaeological data for an unreasonable period.

OA STANDARDS AND PROCEDURES

11.12 OA shall conform to the standards of professional conduct outlined in the Institute of Field Archaeologists' Code of Conduct, the IFA Code of Approved Practice for the Regulation of Contractual Arrangements in Field Archaeology, the IFA Standards and Guidance for Field Evaluations, Desk Based Assessments, etc. and the British Archaeologists and Developers Liaison Group Code of Practice.

11.13 OA is a member of the Institute of Environmental Assessment and the Council for British Archaeology.
11.14 Project Managers normally will be full members of the IFA. For more extensive and complicated evaluation projects especially where they are part of large-scale programmes of work in historic urban centres, the procedures outlined in English Heritage’s Management of Archaeological Projects 2nd Edition 1991 (MAP 2) will be followed for immediate post-field archive preparation and initial assessment. Agreement to then be reached, in collaboration with the local authority’s archaeological representative, about what aspects will need to be taken forward to provide a report in the required format containing the information needed for planning purposes.

Project details
Project name: Nettlebed Old School Site
Short description of the project: Between July 2009 and January 2010, Oxford Archaeology carried out an archaeological watching brief at The Old School Site, Nettlebed, Henley-on-Thames, Oxfordshire (NGR: SU 699 867). The work was commissioned in advance of the construction of a new access road, several new dwellings and associated landscaping. The watching brief revealed deposits of topsoil overlying natural clay and features relating to the demolished school buildings but no other archaeology was observed.
Project dates: Start: 16-07-2009 End: 19-01-2010
Previous/future work: No / No

**Archaeology present?**

- Yes

**Undated:**

**Other:**

**COMMENTS**

- Excavated two test pits along side of road to Glastonbury Down.
- Colour of conditions:
  - Upper part:
    - Soil and clay
  - Lower part:
    - Clay and gravel

- Findings:
  - TP1: 1.5 x 1.4 x 0.6m
  - TP2: 2.7 x 1.8 x 0.7m

- Observations:
  - 0.22m:
    - Terrace with small clay and gravel
  - 0.61m:
    - Some bones found below gravel
    - Sand and gravel with occasional large clasts and calcarenite
  - 1.1m:
    - More small finds, some clay with gravel

- TP2 same as TP1, but lot of disturbance from test holes. Some bone recovered.

**Type of construction work:**
Excavation of service trench + foundation trench.

**Contacts made:**

**Archaeology present?**
Yes: [ ]
No: [x]

**Undated:**

**Other:**

**COMMENTS**

On site to monitor excavation of service trench across north end of site and excavation of sample foundation trench at south west corner of site.

Centre of site affected by existing mains services; client still awaiting permission to remove them from Thames Dater. Development delayed in centre of eastern half of site until services moved.

Service (electric) trench: Dog across north-western edge of site. Trench 0.5m wide, 0.6m deep, 15m dog by machine.

Trench wholly contained within layer of dark brown silt loam, much CDM waste concrete etc. suggesting layer of made ground associated with demolition of school.

Foundation trench: Dog in south-west corner of site.

Records: Photos & sketch plan.
Nettlebed School

Stratigraphy

Type: Dark brown silt loam. Much 0.3m, flints, and mortar lens. 0.3m deep at western end, increasing to 0.6m deep at eastern end. Modern made ground.

Light yellow brown sandy silt, much sub-angular flint. 0.35m at western end. Tapering off to centre of trench. Probable colluvium.

Stiff orange yellow brown clay, much angular flint, natural clay.

Concrete footing associated with old school observed. No periods early than late post-med observed.

**Undated**

**Other**

**Comments**

Met Ken & Alan on site. Excavated area 8 x 4m. 0.5 - 0.8m deep.

N. Facing section shows soft dark blue/black sandy silt topped/made ground with concrete, C&M & metal pipe inclusions. Beneath this was a firm dark brown sandy clay subsoil, firm bright orange clay natural with 30Y. Sub-rounded flint nodules.

W. half of site not excavated. Topsoil/subsoil. No pipe running N-S on E. edge of site.

No observable arch

COMMENTS

On site to monitor excavation of foundation trenches within area reduced level area (ground reduction previously monitored.)

General slope in ground to SE corner of site.

Base of topsoil still visible in SE corner of reduced area (see sketch plan).

Topsoil: Very dark grey brown silt loam.

Subsoil: Dark yellow brown clay silt visible in both section and base of reduced area.

Natural Orange brown silt clay many subangular medium flakes.

No features visible in base of reduced area. Possible layer of collision.

Very dark grey brown clay silt +) visible in section in eastern foundation trench (see sketch section) No other contexts.

Records: Digital photographs.
Visible.
Foundation trenching to continue in western half of reduced area wholly within area already reduced to natural clay, informed client no need to monitor.

Sketch of section.
Sketch plan of reduced area.

Grand Clearence for construction.

**Contacts made**

**Archaeology present?**

Yes: [ ]
No: [x]

Undated:

Other:

**COMMENTS**

Area stripped of overburden + more topsoil. For y main high street, in preparation for foundations.

- Modern demolition stone c. 100-400 mm thick by buildings.
- 20mm topsoil layers, loose mid-brown sand-silt, occasional thin 10-50mm removed on road side but not all areas.
- Due to gradual slope of ground.
- Subsoil - mild yellow-brown sand clay c. 100-300 deep area removed on road side.

- Natural is mid yellow-brown soft clay-silt with 30% flint.
- Only seen in one feature.

- Evidence of modern drain, no other evidence.

- Area c. N-S 10m, E-W 20m

- Fencing for the base to be dug in cleared area tomorrow - will inform Police.
On site to maintain foundation trench excavation within an area of reduced ground in NE corner of site abutting Av-23.

For full extent see plan.

Trenches 0.6m wide x to 1.3m deep.

Stratigraphy fairly uniform throughout:

0.2 - 0.3m grey brown clay bone tough
1.02m mid brown clay soft subsoil/colluvium
2.5m pale red brown natural clay near triangular stones.

No evidence for buildings depositing same material observed.
